Full Stack Developer

<https://www.linkedin.com/in/sriraj-m-654b78246/> | srirajappu22@gmail.com | +91 88380 76826

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building responsive, component-based web applications using **React.js, Redux, Context API, Next.js, and Vue.js, with a Node.js, PHP frameworks like Laravel and Yii2 for backend and REST API integration**. Experienced in **Micro Frontend (MFE) architecture** and AI-assisted development workflows (GitHub Copilot, Cursor, Claude, ChatGPT). Has delivered production features for US-based clients in real estate and conference-management platforms, and supports team growth through code review and onboarding of new engineers.

TECHNICAL SKILLS

Front-End: React.js, Redux, Context API, Vue.js, Next.js, JavaScript, TypeScript, HTML5, CSS3/SCSS, Tailwind CSS, Ant Design, Material UI

Cloud: AWS S3, AWS EC2

Back-End: Node.js, Express.js, PHP (Laravel, Yii2), REST API Design & Integration

Databases: MySQL, PostgreSQL

Architecture: Micro Frontend (MFE) Architecture, Component-Based Development

Testing & Tools: Git, Bitbucket, JIRA, Monday, CI/CD Pipelines, Jest, GitHub Copilot, Cursor, Claude, ChatGPT / AI-Assisted Development

PROFESSIONAL EXPERIENCE

Mitrahsoft Solutions Pvt Ltd — Senior Software Developer

September 2022 – Present

Real Estate Management Application

Client: US Company

Technologies: ReactJs, PHP (Yii2), MySQL, SCSS, Redux Toolkit, AWS S3

April 2024 – Present

Description

A platform connecting landlords with tenants. The admin site lets landlords add, update, and showcase property listings, and includes a content management tool for creating and drag-and-drop editing of marketing templates, shareable via social media, email, and SMS with event-based automation. Dedicated screens cover listings, rentals, buyers, tenants, mail logs, and office/team management.

Responsibilities

- Developed and maintained front-end components using React.js and JavaScript for a landlord/tenant management platform supporting 1,000+ landlords and 10,000+ property listings.
- Built a drag-and-drop content management tool enabling landlords to create and publish marketing templates across web and social channels.
- Integrated SQL databases to manage property listings, leads, and dashboard data, and optimized site performance, reducing average page load time by 90%.
- Delivered feature demos directly to business stakeholders, translating functional requirements into working UI.

Conference Management Application

Client: US Company

Technologies: ReactJs, Redux Thunk, NextJS, Node.js, MySQL, PostgreSQL, Tailwind CSS, Ant Design, Material UI

April 2023 – April 2024

Description

A conference management system for administering and publishing conferences, built from compartmentalized modules (e.g., Submission, Review, Program, Form) that integrate with one another, with support for multiple modules of the same type to handle different submission types within a single conference. Clients can pick and combine modules to plan and run their event.

Responsibilities

- Built dynamic, role-based forms and validation flows for administrators, organizers, reviewers, and participants across 6 conference-management modules, including submissions, reviews, registrations, and event workflows.
- Developed responsive, reusable UI components with React, Redux, and Tailwind CSS across all 6 modules for a multi-client conference platform.
- Designed and integrated REST APIs with a Node.js backend to manage conference data and module-based functionality across the platform.
- Implemented Redux-based state management to maintain data consistency across 6 interconnected application modules.
- Reviewed pull requests for engineers on other project teams and helped onboard and train 10+ new developers, supporting code quality and team ramp-up beyond own project scope.

Employee Internal Application

Client: Mitrahsoft (Internal)

Technologies: ReactJS, TypeScript, Jest, MongoDB, Node.js, RestAPI, Bootstrap, AWS S3

September 2022 – April 2023

Description

An internal application for Mitrahsoft employees to fill timesheets and complete internal exercises for review. Reviewers evaluate submissions and send them back for rework when corrections are needed, continuing until the exercise is complete. The application also maintains employee details, including leave records.

Responsibilities

- Developed and maintained employee management features using ReactJS and TypeScript for timesheets, exercises, leave management, and employee workflows.
- Designed reusable UI components and responsive screens to enhance employee and reviewer experience.
- Implemented exercise submission and review workflows with feedback, correction, and rework cycles.
- Integrated APIs and managed application data handling for employee details, timesheets, submissions, and leave records.
- Performed unit testing using Jest, debugging, and performance optimization to ensure application reliability.

PROJECTS DOMAIN EXPERIENCE

Real Estate, Conference Management, Company Internal Portal
